

KINGSTON PLAZA

KITCHEN & BATH
DESIGN GROUP
Powered by  Oprea Technologies

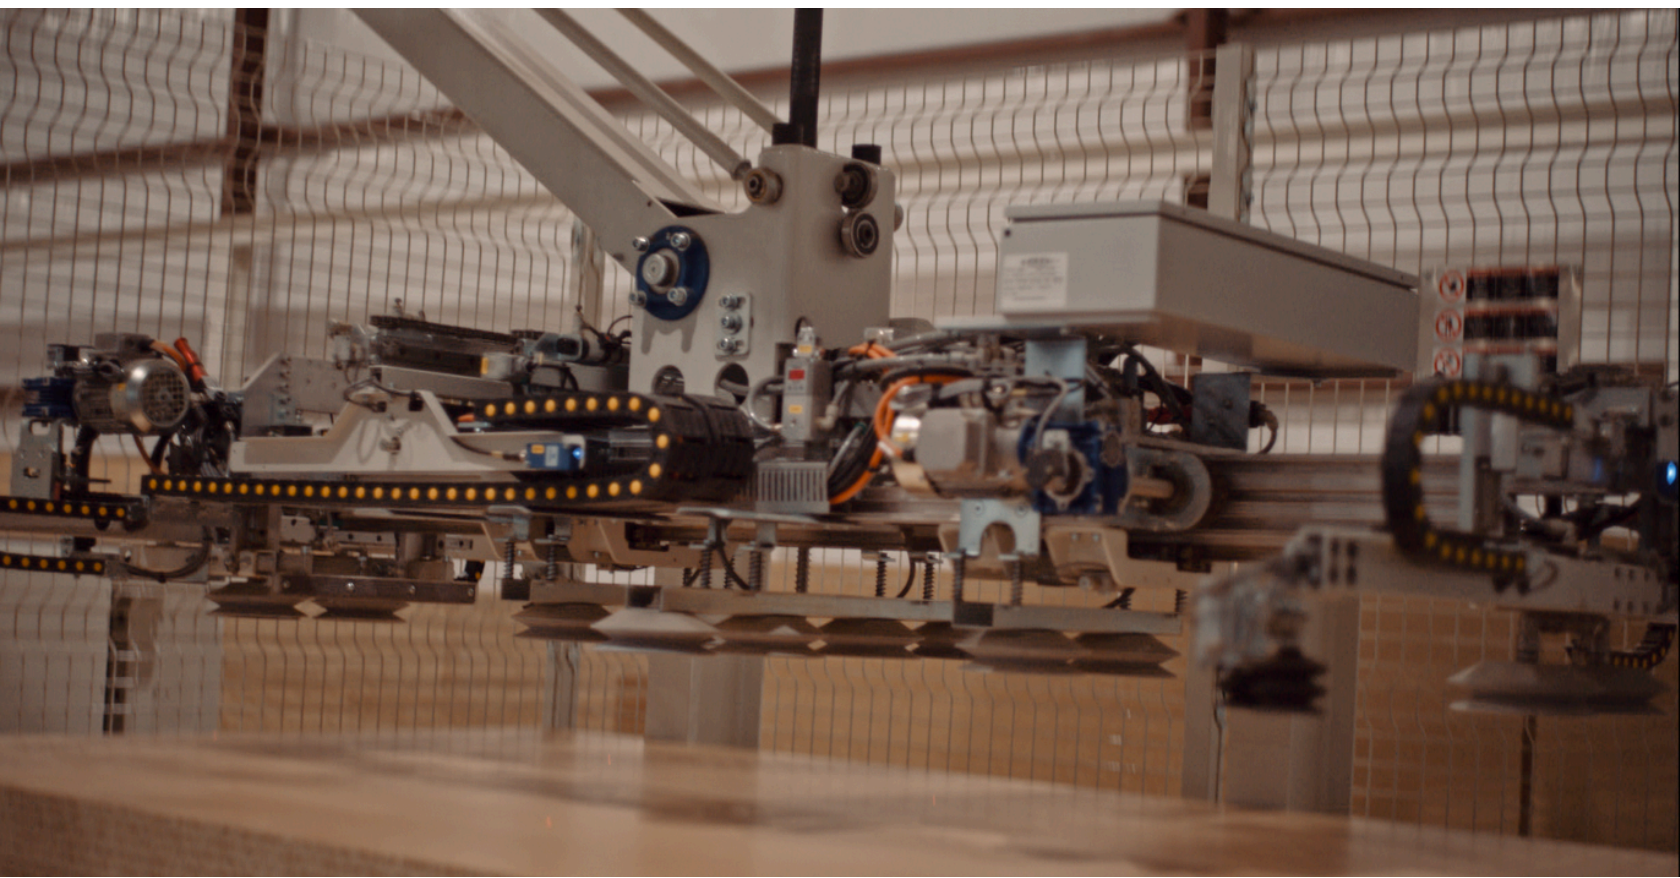

Born in Romania, I am the fifth generation in woodworking. My great-grandfather's cabinet shop was confiscated by the communist party, which forbade personal businesses. In the early 1980s, my grandparents migrated to the United State, paving the way for my father and our family to join in the early 1990s. My father established a small cabinet shop to support us. After his passing, i founded a new company to provide for my family. With God's blessings, our business now supports many families and embraces new technologies in cabinet manufacturing.

“IN THE WORLD OF CABINET MANUFACTURING, LET AUTOMATION AND ROBOTICS BE THE HANDS THAT BRING OUR CREATIVE VISIONS TO LIFE, CRAFTING EACH PIECE WITH PRECISION, EFFICIENCY, AND A TOUCH OF INNOVATION.”

Sam Oprea, CEO

FLEX STORE

Optimize panel handling with Flex Store: automatic 3-axis storage for seamless efficiency

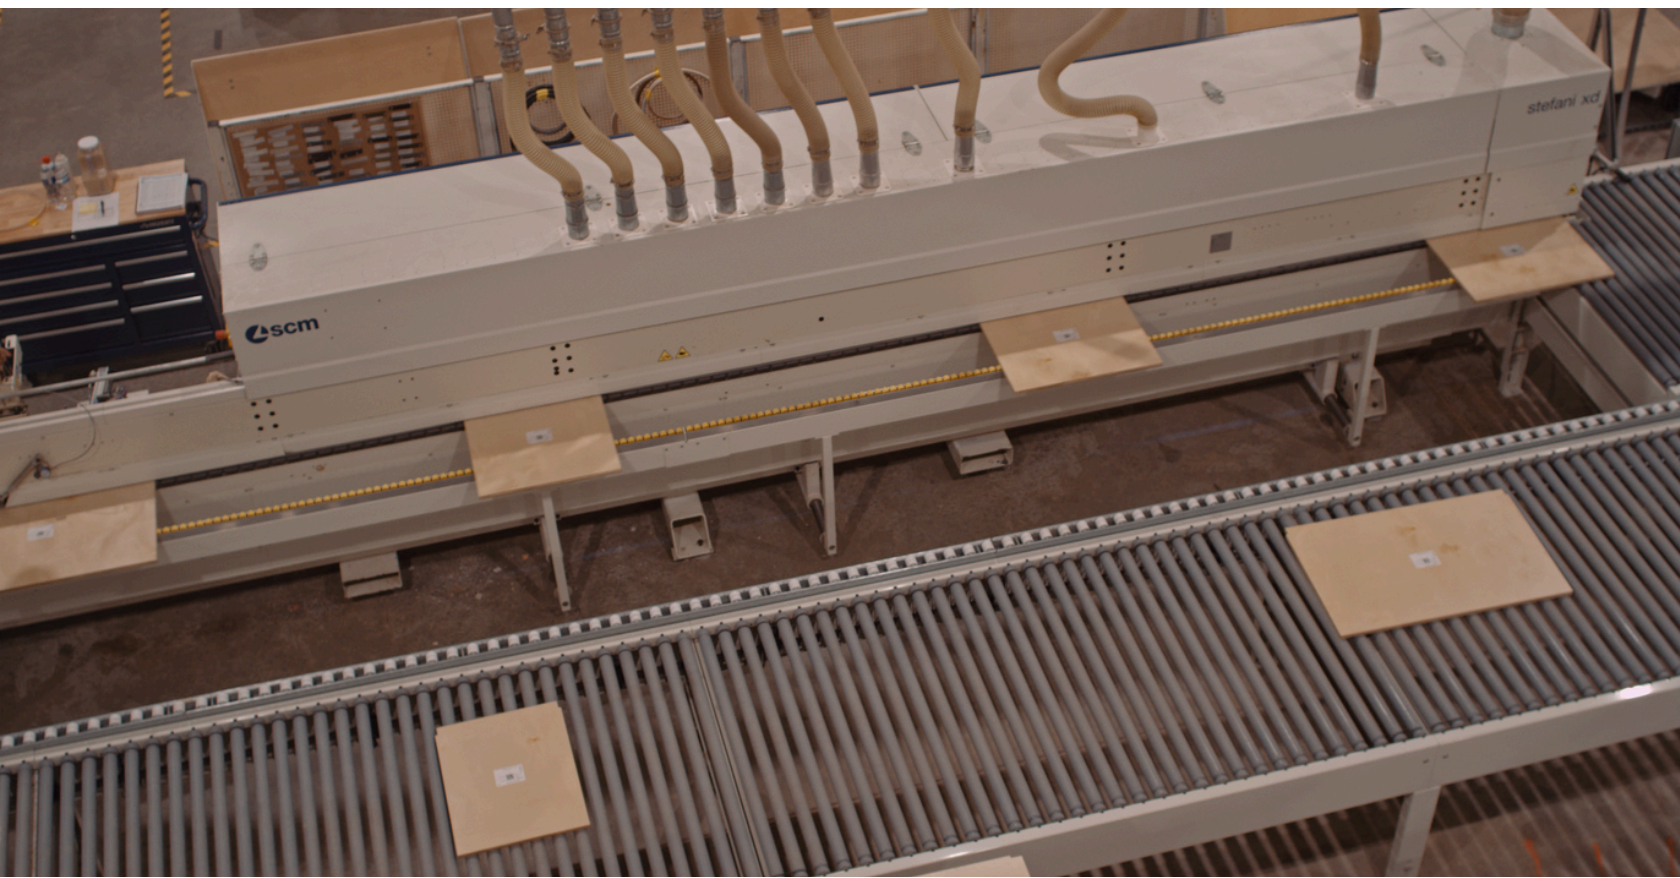

CNC

Precision and efficiency redefined: CNC woodworking machining at its finest

ROBOTIC

7-axis robot for unloading a CNC table, performing dowel inserting, and handling sorting and kitting tasks significantly enhances both accuracy and efficiency in manufacturing processes

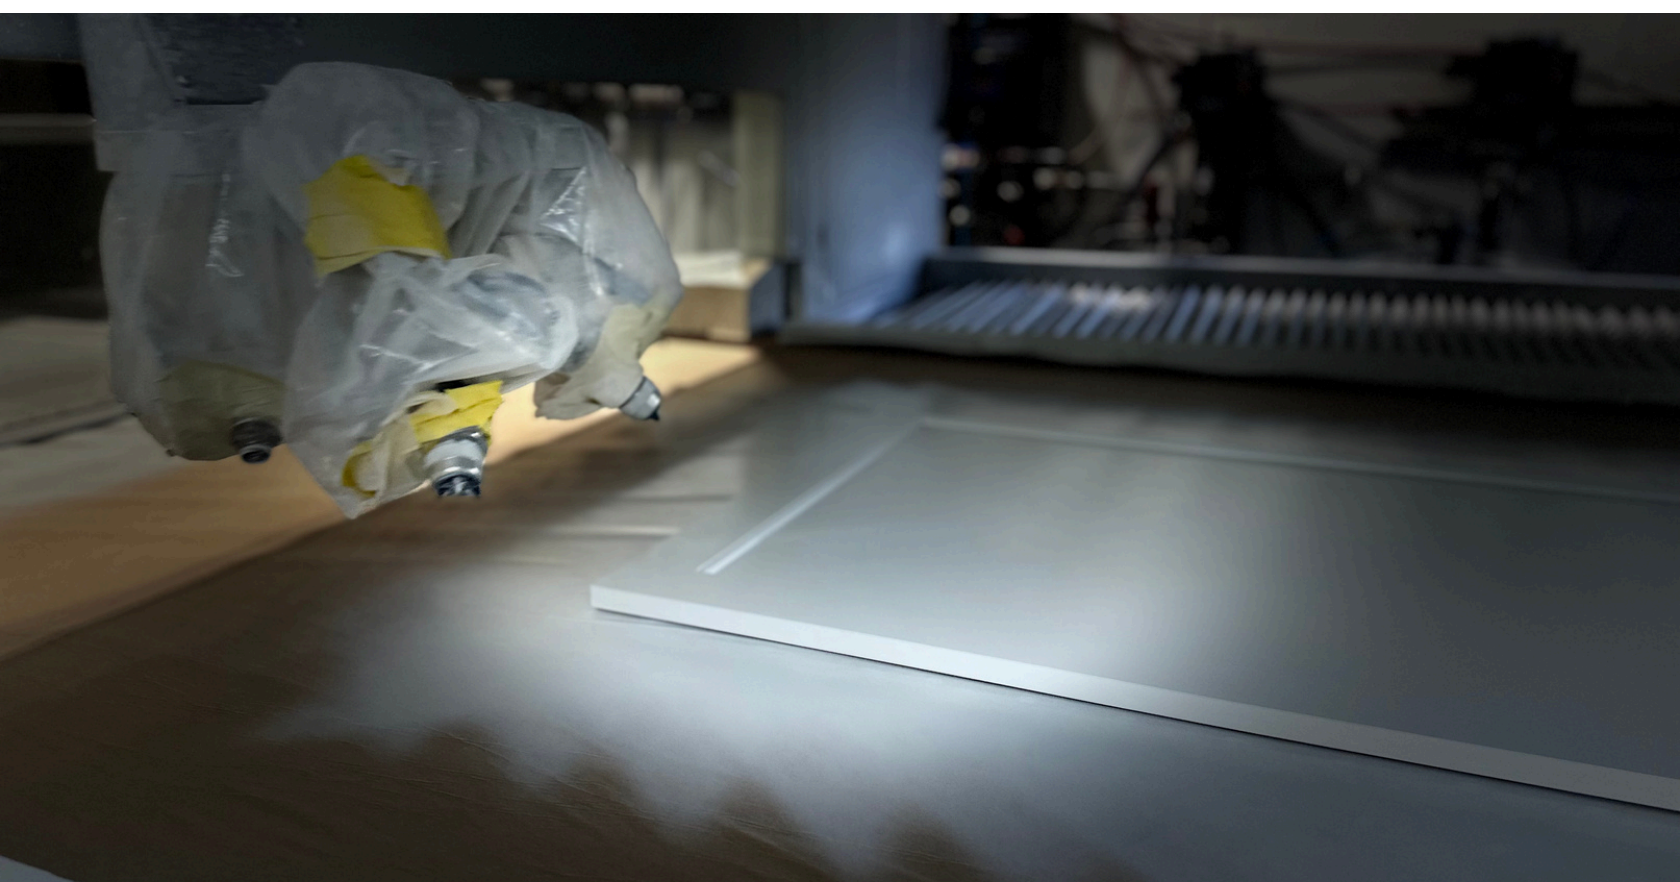

EDGE BANDING

Precision and elegance meet at the edge: Elevate your woodworking with flawless edge banding

CUSTOM

Crafting timeless beauty with custom woodwork cabinets, where every detail tells a story

FINISHING

Achieving flawless beauty: Cabinet paint finishing with precision flat line spray and oven curing

ASSEMBLY

Mastering the art of cabinet assembly: precision, strength, and elegance in every piece

PACKING & DELIVERY

From our hands to your home: expert packing and delivery of your custom cabinets
